

ANSHU SHARMA

Senior Frontend Engineer · React.js · TypeScript · Node.js

Noida – 201009, UP, India · +91-7701873990 · anshu.devops@gmail.com · linkedin.com/in/anshu-sharma-738b962b8 · github.com/anshu-devops

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience building scalable, high-performance enterprise web applications in React.js, TypeScript, and Node.js. Delivered measurable outcomes at Wipro and GlobalLogic: reduced page load times by 30%, raised Lighthouse performance scores from 62 to 89, and scaled real-time analytics dashboards to 10,000+ daily active users. Deep expertise in Redux Toolkit, React Query, Zustand, REST API integration, OpenAI chatbot development, D3.js data visualisation, and shared component library design.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI

State Management: Redux Toolkit, Redux, Context API, Zustand, React Query, RTK Query

Backend & APIs: Node.js, Express.js, REST API design, WebSocket, OpenAPI/Swagger

Data Visualisation: D3.js, Recharts — real-time dashboards, drill-down charts

AI / LLM Integration: OpenAI API, prompt engineering, streaming token rendering, chatbot UI

Testing: Jest, React Testing Library — 75%+ code coverage

Performance: Code splitting, lazy loading, React Profiler, memoisation, react-window

Tools & Workflow: Git, GitHub, Postman, Jira, VS Code, Agile, Scrum

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — Wipro | Noida, India Dec 2024 – Present

Banking and smart-card web applications for enterprise clients; internal AI chatbot platform.

- Led full frontend development of a secure smart-card banking portal in React.js and TypeScript, achieving ~30% reduction in average page load time through lazy loading and route-level code splitting.
- Architected a shared component library of 20+ reusable, fully typed UI modules adopted across 3 product teams, cutting new-feature scaffolding time by ~40%.
- Built a full-stack AI chatbot interface using the OpenAI API with streaming token rendering, conversation history management, and system-prompt templating tailored for banking workflows.
- Reduced OpenAI API spend by ~25% through prompt caching and API-key rotation middleware on the Node.js/Express.js backend.
- Drove performance engineering — profiled render bottlenecks with React Profiler and resolved them via memoisation and optimised hook patterns.
- Mentored 2 junior developers on TypeScript best practices and component architecture.

Senior React Developer — GlobalLogic | Noida, India Mar 2021 – Dec 2024

Enterprise analytics platforms and workflow tools for Fortune-500 clients; data-heavy production UIs.

- Architected a multi-tenant analytics dashboard with D3.js and Recharts, delivering real-time KPI visualisation to 10,000+ daily active users.
- Led Redux-to-Redux Toolkit migration across the entire codebase, eliminating ~40% of boilerplate and improving state debugging with RTK Query caching.
- Designed a reusable form-builder component (React Hook Form + Zod) deployed across 8 enterprise workflow screens.

bullet Improved Lighthouse performance score from 62 to 89 on a client-facing portal through image optimisation, bundle splitting, and deferred third-party script loading.

EDUCATION

Bachelor of Technology — Computer Science & Engineering

Strong foundations in algorithms, data structures, and web technologies.
